
FINDING A JOB IN THE PANDEMIC

What is the Problem?

There are Many people who lost their job in the pandemic like Daily – Paid Workers and after the pandemic finding a job for them become so much hard especially in these days

How we can solve it?

By creating a site for developing skills in various fields that include courses and jobs available for specific field to help anyone improve himself and find a job in any field he wants. The site contains links to courses in a field that the person determines from the beginning until he gains the necessary experience to help him start his new field and qualify it and may include sites You need that experience. An individual can attach his data and testimonials to the site so that company owners can find them and employ them. Even a site can be available for technical worker to improve himself and can people contact with them for issues. We will create a website and use node is as back end for website that includes links to the training courses and their sequence to make it easier for individuals and they can create a personal account that includes its information for the public and attaches its experiences. In this way, we help individuals to develop their skills in different ways, organize the process, their ability to find suitable work, reduce the unemployment rate, facilitate the creation of professional and technical workers with good experience, and ensure the comfort of the client and the population.

Why we need to create it?

Helping people to find job using a safe and very easy way will improve their live and find more opportunity to settle in their life
